

FestPass project brief

Programme

Team Lantern is building FestPass for Campus Build Sprint 2026, the two-week programme run by the college Innovation Cell.

Faculty coordinator: Prof. Meera Kulkarni, Innovation Cell.

Problem

Registrations for Autumn Fest still run on paper forms and group-chat polls. Students register twice

for the same event, forms go missing, and organisers can't tell how many seats are left until the doors open.

Goals

- A student can find an event and register in under a minute.
- Every registration produces a QR pass that volunteers scan at the door.
- Organisers see a live seat count for each event.

Team

Ananya Iyer, Rohan Mehta, Ishita Rao and Dev Malhotra, all second-year students.

Timeline

Final submissions close on 20 September 2026.

Budget

Budget cap: ₹50,000 (Innovation Cell grant).

Out of scope

Payments for paid workshops, and events outside Autumn Fest.
